

Postman Environment & Collections

Postman Environment Variables

1.name your Environment

4. Choose your environment

VacQ

VacQ

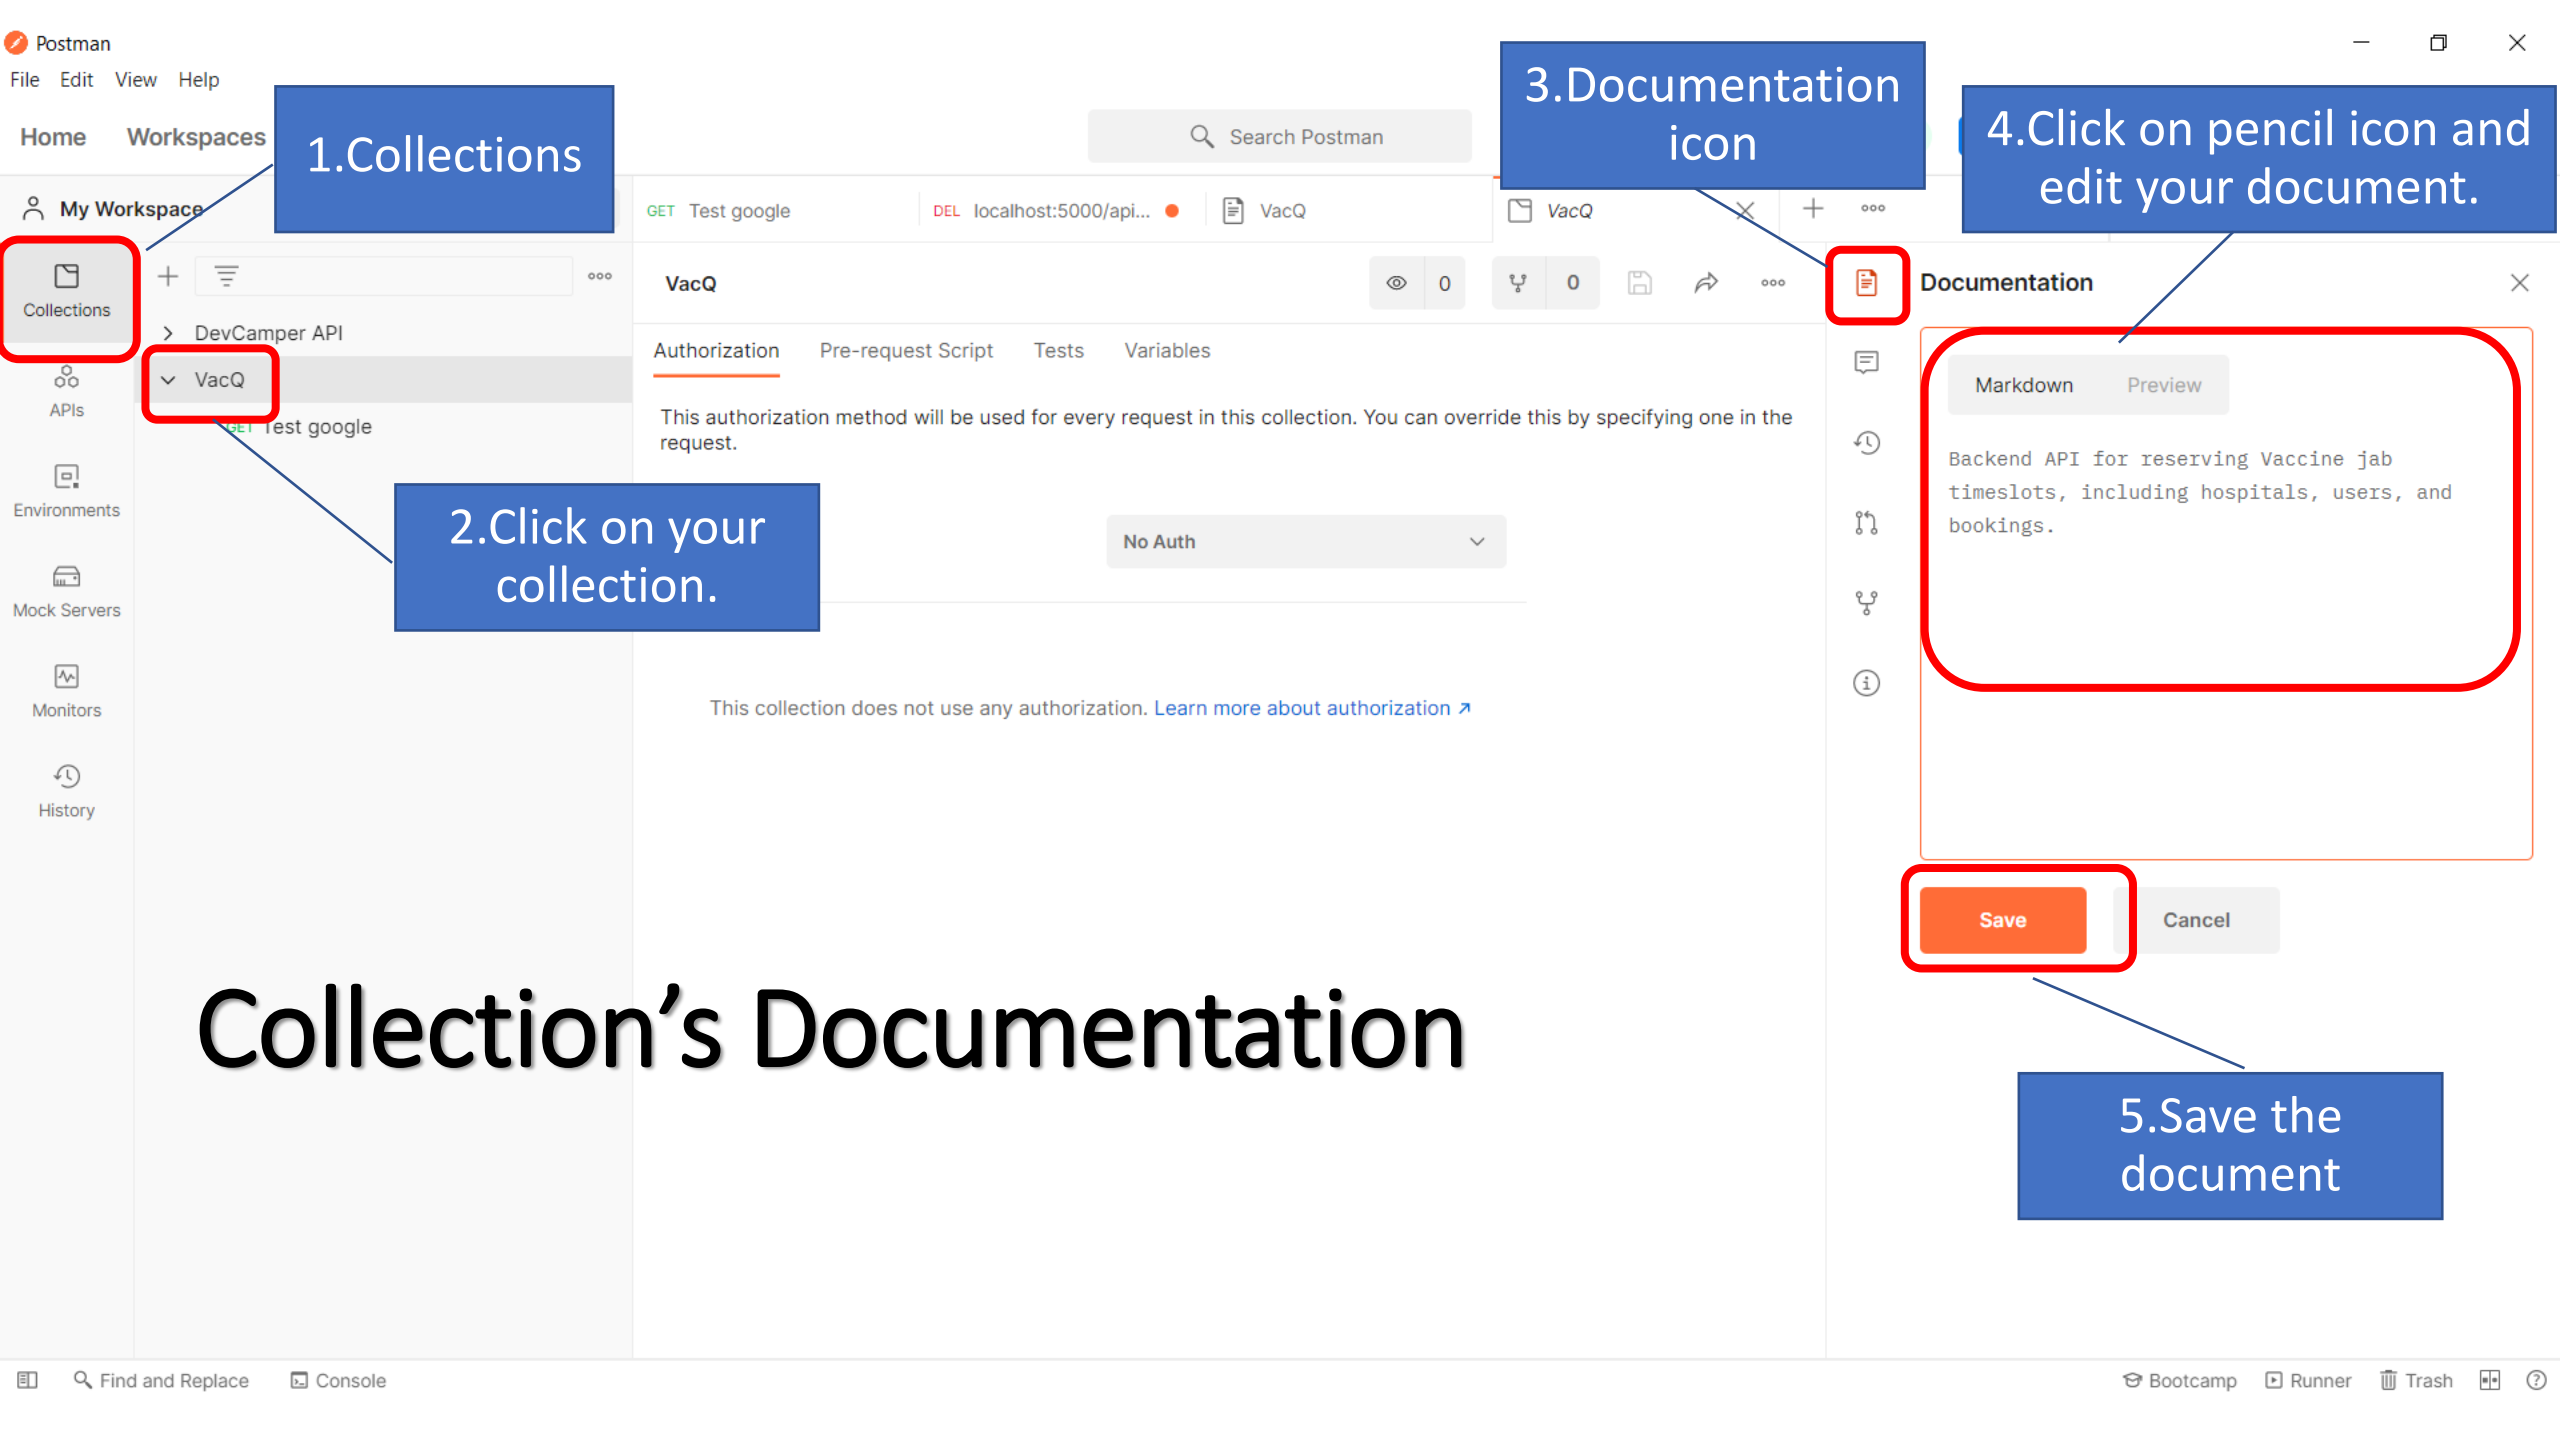

Save

3.Save the environment

2.Initiate variable with value

| | VARIABLE | INITIAL VALUE ⓘ | CURRENT VALUE ⓘ |
|-------------------------------------|----------|-----------------------|-----------------------|
| <input checked="" type="checkbox"/> | URL | http://localhost:5000 | http://localhost:5000 |

ⓘ Use variables to reuse values in different places. Work with the current value of a variable to prevent sharing sensitive values with your team. [Learn more about variable values](#)

1.Collections
